

# BECOME AN ACADEMIC MENTOR

## We Need YOUR Help!!!

We are looking for caring individuals, who will help provide youth, who are at risk of educational failure with academic and social support, counsel, friendship, reinforcement and a constructive example.

Our academically focused mentoring program puts more emphasis on building a one-on-one relationship between a mentor and a mentee.

It also gives mentors more flexibility to spend time talking with their mentees about both academic and non-academic issues.
